

RiteGo®

**LAUNDRY
SPRAY SPOTTER**

RiteGo® - with Micro-Emulsion Technology

RiteGo laundry spray spotter is high performance, fast acting, environmentally friendly and cost-effective. Use it on collars & cuffs, wedding gowns, and anything else you're washing or wetcleaning.

RiteGo out-performs supposedly similar products without the labor expense and wear-and-tear that come from brushing. Your customers will appreciate getting back items that look better and last longer.

DIRECTIONS

Before starting, read and understand the RiteGo Safety Data Sheet.

Spray & Wash:

- Simply spray the stained area with RiteGo, then wash it out. For the most heavily soiled areas, tamp before washing.

As a Soak:

- Mix 1 ounce of RiteGo per gallon of water. Soak stained area for an hour or more, then wash.

New Micro-Emulsion Technology

RiteGo quickly penetrates to absorb oils and to release collar & cuff stains, perspiration, ground-in soil and more.

No Brushing Required

Just spray it on and wash it out, saving time and labor. And since brushing causes damage, your customers' goods will last longer.

You Delivery Better Quality

By delivering stain-free goods, you build your reputation for quality - and that's what keeps customers coming back.

Environmentally Friendly

RiteGo is biodegradable, noncombustible and California 2013 VOC and Prop-65 compliant.
